

# \$250 OFF YOUR FIRST AvaDent Monolithic Fixed Hybrid WITH INTEGRATED TI-BAR

**USE PROMO CODE: AVADENT250 WHEN ORDERING**

Limit 1 Per Customer • Offer good from February 1st, 2021 through February 28th, 2021

Patented one-step high-pressure injection molding permits the monolithic prosthesis and bar with implant interfaces to be milled concurrently.

Printed medical grade Ti-bar with open mesh ensures maximum adhesion between PMMA and titanium.

Concurrently designed bar and teeth ensure that the occlusion and implant interfaces are in perfect alignment.

Compatible with most implant platforms, with more than 6,000 implants in the digital library.

Patented true monolithic (one-piece) construction means no risk of tooth pop-offs or delamination.

In my private practices, we exclusively use the AvaDent Monolithic Fixed Hybrid with Integrated Titanium Bar as we offer our patients the most innovative therapies in dentistry today. When I am educating with the Digital Dentistry Institute, this technology is emphasized to reduce complications with acrylic hybrid treatments to prevent delaminations and fracture of prostheses.
